Letters were sent to parents of children at the schools, residents, headteachers, Chairs of Governors (CoG), school staff, Headteachers, CoGs at all schools within 2 miles, and special schools in the districts, Local Councillors, local Dioceses, Union Representatives, Local MP's, HCC Elected Members.

68. The impact on the other protected characteristics was neutral.

Climate Change

69. Hampshire County Council utilises two decision-making tools to assess the carbon emissions and resilience impacts of its projects and decisions. These tools provide a clear, robust, and transparent way of assessing how projects, policies and initiatives contribute towards the County Council's climate change targets of being carbon neutral and resilient to the impacts of a 2°C temperature rise by 2050. This process ensures that climate change considerations are built into everything the Authority does.
70. The carbon mitigation tool and the climate change adaption tool were not applicable because this is a strategic capital programme report. The Climate Change Impact Assessment will be undertaken in conjunction with colleagues in Culture, Community and Business Services as individual projects are developed and brought to future Decision Days.

Conclusions

71. In considering the supportive responses received, the County Council believes that the developments of the Schools and Resourced Provisions, as detailed above, are necessary to meet the County Council's statutory duty for children with SEND, and that the comments received did not represent

sufficient concern to prevent final approval for these developments, so that they can be ready in time for the new Academic Year in 2021.
