

Suspension & Exclusions

Data notes

- The most recent national exclusion data is Autumn 21-22. HCC Autumn 21-22 is discretely compared to this across the graphs and tables.
- HCC Exclusion data is exported from Capita as informed by the School Data Feed or manually uploaded by ISS.
- National exclusion data is exported from separate exclusion tables from the school census.
- Autumn 22-23 figures are roughly half of the figures of the **whole** of 21-22 Academic Year.

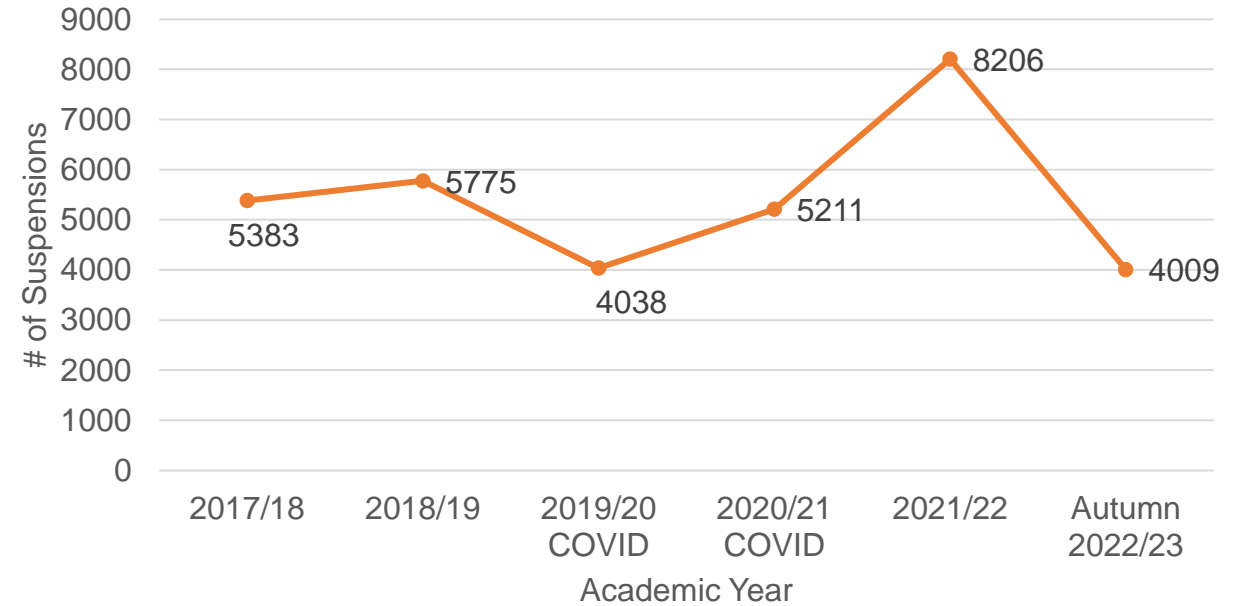

HCC Primary & Secondary Suspension Totals

Primary Suspensions

Primary academic year	suspension
2017/18	2085
2018/19	2063
2019/20 COVID	1434
2020/21 COVID	1283
2021/22	1763
Autumn 2022/23	732

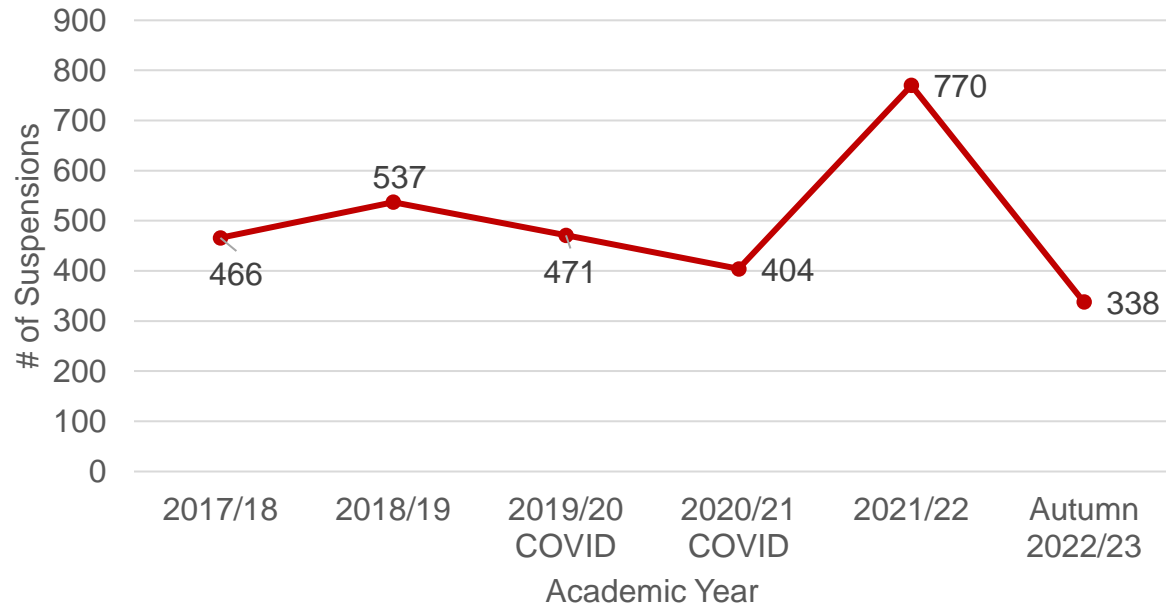

Secondary Suspensions

Secondary academic year	suspension
2017/18	5383
2018/19	5775
2019/20 COVID	4038
2020/21 COVID	5211
2021/22	8206
Autumn 2022/23	4009

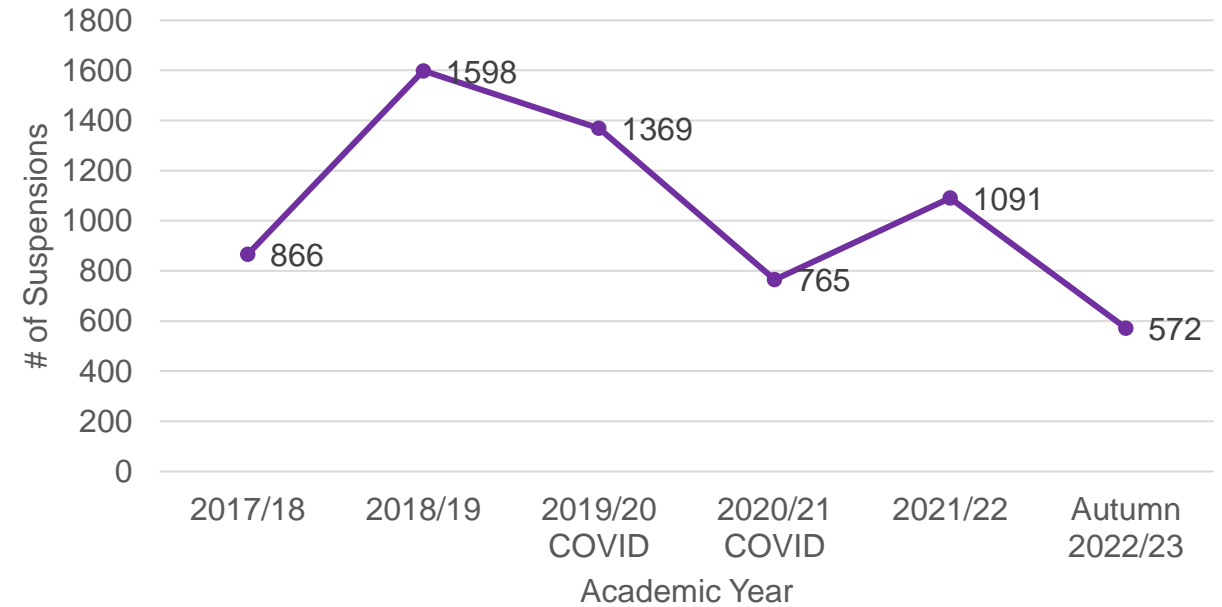

HCC Special & Education Centre Suspension Totals

Interventions – Now and Next

- Excellent channels of communications with schools from direct phone lines to e-mail enquiries and dedicated inboxes. Most queries are dealt with within 24 – 48 hours.
- Communications with our ‘support and challenge’ approach continue the successful relationship we have built with all Hampshire schools irrespective of their designation.
- ISS works effectively within Children Services, liaising, supporting meetings and conversations to promote inclusion and provide solutions for our most vulnerable children.
- Patterns of exclusion and rising profiles and numbers are shared with partner agencies so that we can all join together to reduce exclusions and days lost to education for young people.
- Countywide exclusion data is shared with all parties including schools in order to identify concerns and address trends.
- ISS shares information and issues around exclusion when delivering presentations and training to many stakeholders.

The Future

- If the current trends of increased permanent exclusion remain serious thought needs to be given to how we can incentivise inclusion over exclusion.
- There is a need to build more resilience in schools and look at proactive rather than reactive measures around challenging behaviour. This involves looking at schools' individual and joint resources creating in house alternative provision to engage and meet the needs of children.
- Transformation needs to be around how schools can be more inclusive to meet the needs of the children now and in the future.

The big question: How can schools be supported to be thriving centres of inclusive excellence for all our Hampshire children?
