## Capital Expenditure Flows and Financing Resources 2017/18 to 2020/21

## 1 Capital expenditure flows

1.1 The level of capital expenditure (or 'payment') flows is one of the factors taken into account in determining the size of the capital starts programme, together with forecasts of financing resources.
1.2 Expenditure flows in 2017/18 and the following three years will result from works in progress (schemes started in 2017/18 and earlier years) plus those arising from the proposed programme for 2018/19 to 2020/21, as Table 5 below shows.

Table 5 - Capital expenditure flows

|  | $2017 / 18$ | $2018 / 19$ | $2019 / 20$ | $2020 / 21$ |
| :--- | ---: | ---: | ---: | ---: |
|  | $£ 000$ | $£ 000$ | $£ 000$ | $£ 000$ |
| Works in progress at 31 March |  |  |  |  |

| Land acquisition |  |  |  |  |
| Total expenditure flows | 238,074 | 283,005 | 267,758 | 200,321 |

1.3 In practice, expenditure flows in the years after 2017/18 may vary from those shown in Table 5 if further developer and other external contributions become available to fund additional capital schemes, or if the levels of Government support differ from those currently assumed.

2 Resources available for capital financing
2.1 The following table shows the latest estimate of the resources available to finance capital expenditure.

2.2 Most of the capital receipts forecast in Table 6 are required to repay prudential borrowing for school and other rationalisation schemes started in advance of the site disposals.

## 3 Capital reserve

3.1 Resources previously identified in 2012/13 to fund the additions to the capital programme agreed in February 2012 have been added to the Capital Reserve until they are required to fund capital payments in 2013/14 onwards, as shown in Table 7.

Table 7 - Capital reserve

## 4 Revenue implications

4.1 The revenue implications of the new programme are shown in the following table.

Table 8 - Revenue effects

|  | Running <br> costs <br> $£ 000$ | Capital <br> charges <br> $£ 000$ | Total |

| $2019 / 20$ starts | 563 | 5,553 | 6,116 |
| $2020 / 21$ starts | 62 | 3,676 | 3,738 |

Total
$1,863 \quad 17,217 \quad 19,080$
4.2 The capital charges represent depreciation over the estimated life of the asset for most schemes. The capital charges do not affect the County Council's overall expenditure as the charges to services will be counter-balanced by a corresponding credit to the centrally managed capital adjustment account.
4.3 Although the capital charges in Table 8 do not affect the County Council's overall expenditure, it will be increased by the capital financing costs on the loans raised to finance the programme. The full year revenue impact of the additional prudential borrowing over the proposed three-year programme will be $£ 5.2$ million.

## 5 Debt outstanding

5.1 Table 9 below shows the estimated debt to be financed by the County Council including the new borrowings necessary to finance the proposed three-year programme.

5.2 As the table shows, the amount of debt outstanding will increase by 2020/21 and then decrease.

## 6 Prudential borrowing

6.1 In November 2003, Cabinet agreed a framework for the use of prudential borrowing from 2004/05 onwards under the Prudential Code for Capital Finance introduced by the Local Government Act 2003. 'Prudential borrowing' does not attract Government revenue grants towards the loan charges. Instead, the loan repayments and interest charges have to be financed by the County Council from its own resources. Because of the potential impact on the County Council's overall financial position, it is important that the use of prudential borrowing is very closely controlled and monitored.
6.2 The framework, as updated by Cabinet in February 2006, includes:

- borrowing for which loan charges are financed by virement from the Executive Member's revenue budget, including invest-to-save schemes that will generate revenue savings or additional revenue income
- 'bridging' finance that will be repaid by eventual capital receipts, capital grants or contributions, provided that the cost of interest and the statutory minimum revenue provision is met by services in the years that such costs are incurred
- capital investment by business units
- temporary borrowing to accommodate shortfalls in general capital resources.
6.3 The overall level of the County Council's prudential borrowing since 2004/05, including the proposals in this report, is summarised in the following table.

Table 10 - Prudential borrowing

|  | Borrowing $£ 000$ | Repaid to date £000 | Future repayments $£ 000$ | Net total $£ 000$ |

6.4 The schemes funded by these advances are summarised in Table 11.

'Bridging' loans on specific projects to be repaid from capital receipts and developer contributions
Capital investment to be financed from future charges to services34,413

Total
311,510
6.5 The 'bridging loans' in advance of capital receipts or developers' contributions are expected to be fully repaid by 2022/23. In addition to these lump sum repayments, $£ 198.5$ million of the prudential borrowing will be repaid from savings in the revenue budget, including the Enhance nursing care homes, waste management infrastructure and structural maintenance of highways.
6.6 The prudential borrowing agreed to date and now proposed is in accordance with the framework for the use of prudential borrowing under the Prudential Code for Capital Finance. The prudential indicators used as part of the process of assessing compliance are included in Appendix 8 of the report on this Agenda on the Revenue Budget.
