# Why review Family Meetings and Plans?

## *believe*

Developing positive relationships with families is the heart of what we do

Everyone has strengths, and we get the best from each other when we recognise and build on those strengths

In listening, respecting and working together with the child, their family and those that have a responsibility to them

That working to support the whole family will achieve the best outcomes for the child in the long term

That working in this way enables us to identify, respond to and manage risk safely

## *We want*

1. To move towards 'one plan' that travels with the family/child
2. Continue to embed Hampshire Approach
3. Further clarity about our approach to family meetings
4. To build on learning from Covid and flexible ways of working
5. Capture, share and articulate best practice
6. Improve the quality of plans and planning

## *We've done*

Created a family meeting and planning model, supported by new templates, tools, guidance and training.

# Embedding reunification across the service

## objective

?

Our role is to help build, maintain, and support children to return to their family and wider networks.

## believe

Children have the best outcomes when living with their family networks

When we consider care, it should be flexible and draw on family networks whenever possible

A child should be in care *for as long as needed*. Families change and we'll always work with them to establish a lifelong support network for the child, and return them home if/when appropriate.

# Reunification: initial findings

- We've held several workshops with staff discussing reunification
- When we think about 'reunification' we often default to thinking about children in long-term care re-establishing links with their families
- And yet...the practice we identified as important, was about what we do with families before the child even comes into care.

The same themes arose as in our previous gateway projects...

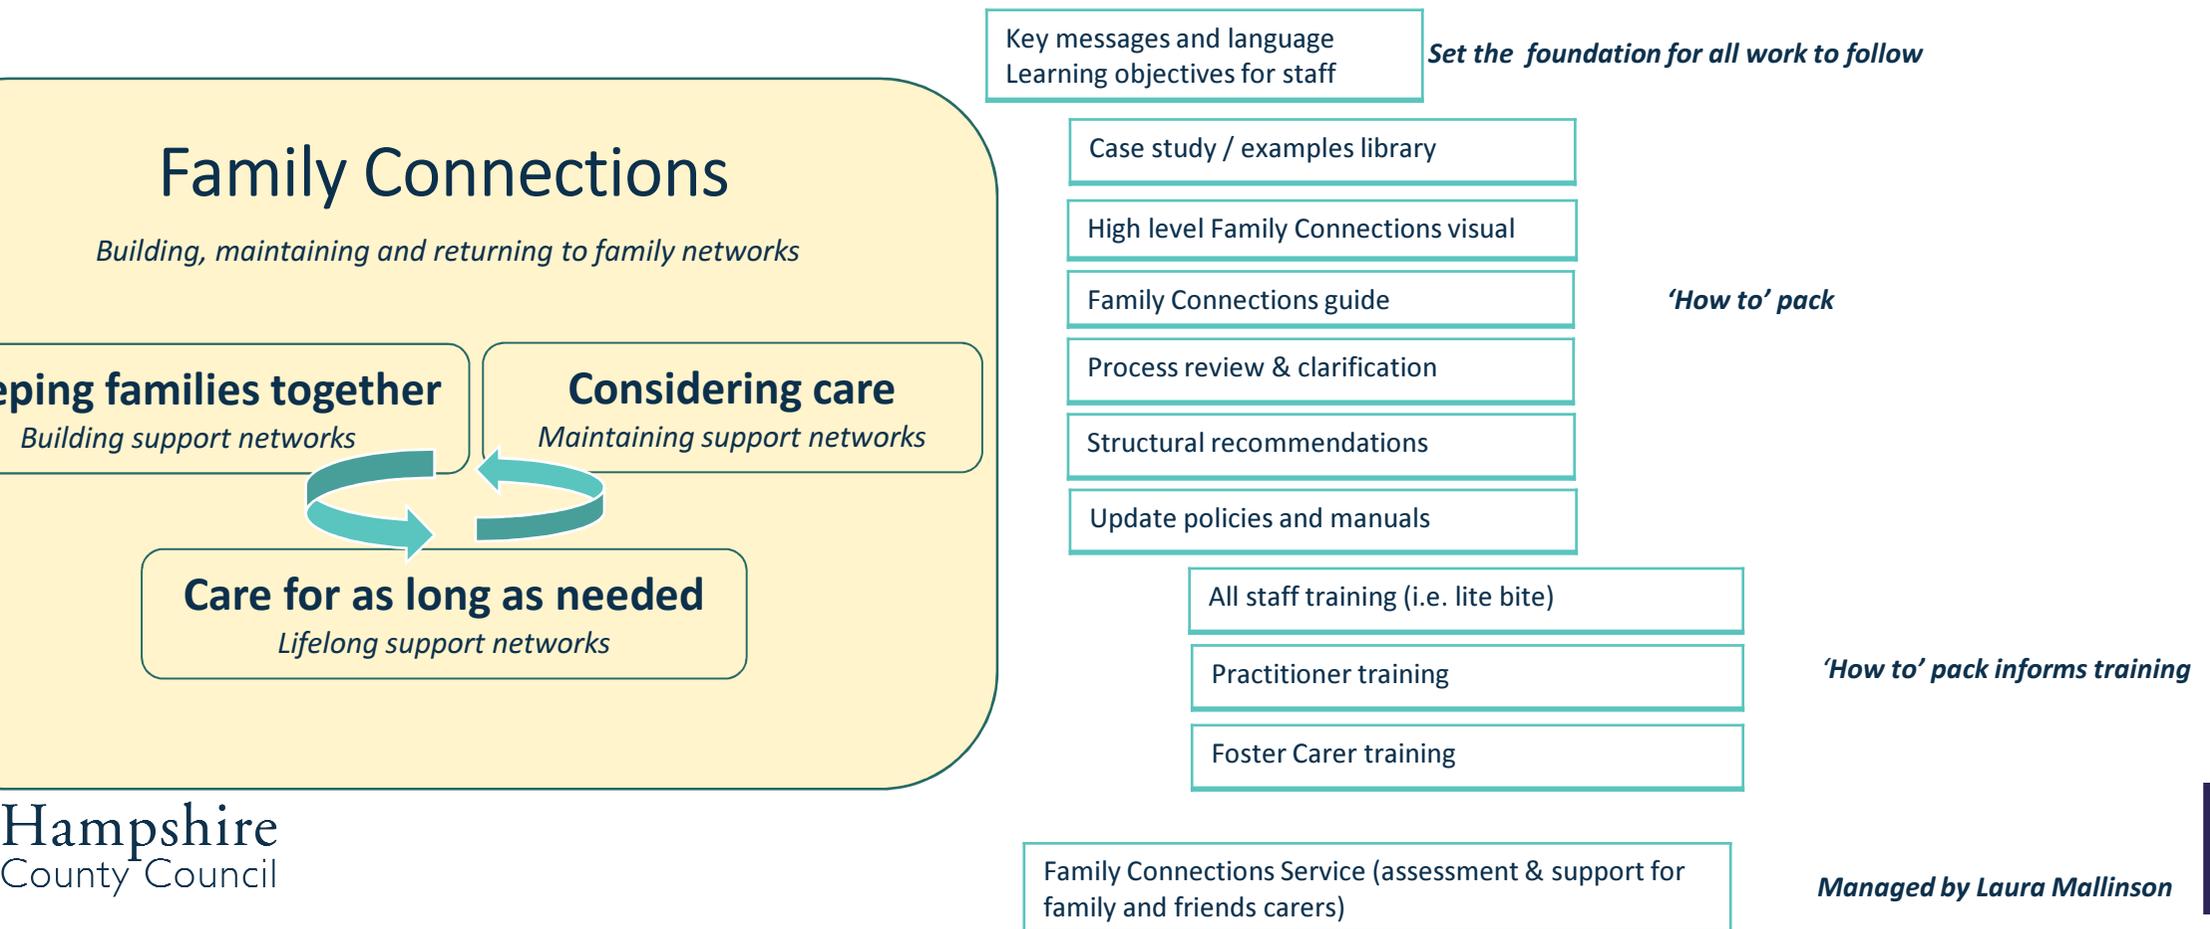

**Earlier and more consistent engagement of the wider family network**

# Family Connections

We identified a series of resources which will clarify and embed better practice in how we engage the wider family network

The Service Development Team will lead the next phase of the project, with support from Transformation Social Care programme

# The role of Corporate Parenting Board

Support and raise awareness

Prioritise reunification/family network housing

Consider how mental health support can best be provided to these families
